A SIGH OF RELIEF

FROM THE DESERTED CITY—ENCOURAGING NEWS.

Fewer Cases and Less Mortality---The Fleeing People may Prevent an Epidemic.

MEMPHIS, July 25.—Each day brings its changes. To-day the situation is decidedly encouraging and hopes are entertained that Memphis may yet be spared the affliction of an epidemic. Nearly all who had the means have left. Those remaining are too poor to go and will have to be supported by public charity in camps that will be established just as soon as the selection of a suitable site can be made.

THE RELIEF QUESTION.

The authorities are determined not to open a commissary depot in the city, and only those who go into camp will be furnished with free rations. There is, however, a movement on foot to organize a citizens' relief committee, which has not as yet assumed any definite shape. The Ancient Order of United Workingmen and Knights of Sol and Knights of Honor have sent seventy-five families of members of their order to places of security. They can do this at an expense of not exceeding $50 for each family, whereas if sickness should come among them the cost of each person attended would amount to not less than $200. The Masons and Odd Fellows will no doubt pursue the same plan. It is not only more economical but it saves lives.

IDLE NEGROES—THE BUSINESS QUESTION.

Large crowds of negroes stand about the street corners and eagerly listen to any report which bespeaks the distribution of free rations and the active operations of the Howard Association. They are persevering in their inquiries of:

"Boss, when is de government rations to arrive?"

As regards business there is nothing to report, no business being transacted. A few stores, scattered here and there, can be found open, but Memphis is almost depopulated of her white inhabitants, and those remaining have no funds to purchase even the necessaries of life. The two Howards that have been placed on duty are actively at work, and have assigned nurses to half a dozen people who were sadly in need of such assistance. President A. D. Langstaff said this afternoon that the organization would not take the field until it was imperative upon them to do so.

THE GOVERNOR'S INSTRUCTIONS.

MEMPHIS, July 25.—One new case was reported to the Board of Health today. Five deaths occurred since last night: Wm. Ward, Mrs. Constance Ammon, John Richmond, H. C. Wehguin, Wm. Copwood (colored). A meeting of prominent citizens was held this morning at which a sub-committee of four were appointed to name a permanent committee of safety who will aid the city authorities to preserve the peace. Colonel John F. Cameron has been ordered here to take charge of the local troops. He arrived here this morning. The authorities are still unable to procure means of transportation to the site selected for the establishment of camp. It has been raining all the morning; the city remains quiet. The following telegram has been received:

NASHVILLE, Tenn., July 25.—To Colonel John F. Cameron, Memphis.—Colonel Cameron is hereby assigned to command of the local troops at Memphis. He will be respected accordingly.

(Signed.) ALBERT S. MARKS, Gov.

NASHVILLE, July 25.—To the officers and soldiers of the colored companies at Memphis.—The eyes of the people of the State are upon you. Prove true soldiers and I will ask the the State to reward you. Remember that the first duty of soldiers is obedience.

(Signed.) ALBERT S. MARKS, Gov.

Four Cases of Fever in New York.

NEW YORK, July 25.—Bartley McKay, a coal heaver on steamer City of Merida of the Havana line, was admitted to the quarantine hospital to-day with the yellow fever. This is the fourth case from the City of Merida, two of which have proved fatal. Johanna Breman, a refugee from Memphis, who has only been in the city three days, died this morning of genuine yellow fever at 345 East Nineteenth street. She was taken sick the day of her arrival but symptoms of yellow fever did not show themselves until last night. All of her effects together with her bedclothes and bedding were burned this morning. The health authorities do not anticipate any outbreak of the disease in the city, as every possible precaution has been taken to prevent it.

Joy Wins.

SARATOGA, July 25.—First race, purse $300 for maidens two years old, five furlongs; Joy won easily, Zicha second, Thy Girl, third. Time 1:04¼.

"Barkis is Willin'."

BOSTON, July 25.—In a letter published to-day General B. F. Butler expresses his willingness to accept the nomination again for Governor of Massachusetts. A call has therefore been issued inviting Butler's friends to meet in a convention at Worcester September 28th to nominate him and other candidates for the State offices.

CHARLIE FULLER.

The most Remarkable Boy in the World.

Bangor Me. Commercial, July 15th.

There is in this city one of the most remarkable boys in the world, probably. He is a son of Colonel Fuller, ex-postmaster of Bangor, and is now ten years of age. His intellect is perfectly wonderful, and almost goes beyond belief. The first that his friends noticed of his precocity was about a year ago, when they accidentally discovered that he was almost infallible on any date he had ever seen or heard. He was out West with his parents at the time, and as he was walking, in company with some relatives, in a cemetery, they observed that he would look at a tombstone, read the date of the death recorded and the exact age of the person buried there, and then glance up and tell what day of the week the dead person was born on. This happened on several occasions, and little attention was paid to it. Finally, however, one of his relatives took pains to look into an old almanac covering some of the dates he had mentioned, and found that the day of the week had been given correctly in every instance. This caused them to ask him questions, when it was discovered that he could almost instantly tell the day of the week on which any date within the last seventy-five years fell. Only yesterday the writer gave the lad dates from 1812 to 1840, and in every case Charlie (that is his given name) gave the day of the week corresponding to that date, and gave it correctly. The longest time occupied in any one case was eight seconds, and the shortest was three seconds, the average being about five seconds. It should be remembered that while he answered there was no book or other article near him from which he could get any aid.

If he has once heard the date of birth, marriage, or death of any of his friends he remembers it, and, of course, from what has been said above, knows on what day of the week the date fell. If one calls his attention to any person and informs him that the individual was born on a certain day of the week and month, he will on seeing that person months afterward speak up and say that that man's birthday falls on a certain day, which is the date he was casually told so long before. Not a great while ago he walked up to one of his relatives and informed him that it was so-and-so's birthday, the date of the person's birth having been told him long ago. For curiosity the relative took Charlie by the hand and walked to the place of business of the friend mentioned. "Charlie," remarked the relative to the friend, "says this is your birthday; is it?" "Well, I didn't think of it before," replied the friend; "but he is right; this is my birthday."

He never forgets a date that he has once fixed in his memory, and is almost invaluable as a statistician. He remembers when every President of the United States was born, when inaugurated as President, and how long he served, and when he died. Any of these dates he gives with scarcely a second's thought, as well as hundreds of others of a like nature. Once in awhile he makes a momentary mistake, but corrects himself almost instantly, never proceeding till he is absolutely certain of what he has already said.

A still more remarkable fact is that he recollects everything that he does, remembers on what day he did it, where he was at the time, and what were the circumstances that led him to do it. For instance, he will tell where he was on any day within the past two years, and what he was doing. Further, he remembers and can tell everything that his friends have done, providing he has seen them do it, and tell on what day of the week they did it.

In mathematics it would be difficult to find a boy of nearly twice his age that can equal him. He computes the most difficult fractions in his head, and will add, subtract, multiply or divide them without difficulty. This is all the more wonderful considering that he has never been taught anything except how to read. One evening about teatime he was informed that the double of two is four. He was informed that the process of getting that result was called multiplication, and that it was all given in the arithmetic. He immediately got an arithmetic into his hands, found the multiplication table, and had all of it by heart at the breakfast table the next morning.

The most remarkable test to which his memory has yet been put is on the Bible. He repeats the name of every book in the Old and New Testaments, in regular order, beginning with Genesis; tells how many chapters each book contains, and how many verses in each chapter in several of the books; and on any portion of the Bible he has read—and he has read nearly if not quite all—will tell the substance of any particular verse in any chapter of any particular book. He tells at once where any particular event is described in the Bible, also where the name of any character mentioned in the scriptures can be found. He not only knows the Bible thoroughly, but can tell without hesitation on what page any particular hymn in Watts' or Moody and Sankey's hymn-books can be found.

Not long ago he greatly amused some of his friends by correcting an almanax. A lady wished to try him on the days of the week on which certain dates, many years ago, fell. She gave a date, and asked him on what day it fell. He promptly informed her. She looked at the almanac for that year, month and day. Alas, for Charlie! thought she, as his answer did not agree with the almanac. Charlie wouldn't give up, however, but declared that he knew the almanac was wrong. "Haven't you another almanac of that year?" inquired one of Charlie's confident friends. "I have," replied the lady; and produced it. On comparing the two almanacs it was discovered that the first one was wrong, and that Charlie was right—a mistake having been made by the party who compiled the almanac.

His habits are peculiar. He never plays with other boys, but is continually busy in reading. Oftentimes he takes an unabridged dictionary and studies it hour after hour, never seeming to consider it anything but a pleasure to do it. In fact, he takes no comfort unless busying his brain about something. If there is anything he does not understand he keeps at it till he does understand it, and then it is next to impossible for him to forget it. One would naturally suppose that a child with such unusual powers would gradually fail and fade away, but, singularly enough, he is constantly growing stronger and more healthy.

Very many will think, perhaps, that his ability in giving the day of the week, etc., on which a date falls, is an act of memory merely, and that he has learned what day of the week each date for several years past has fallen on. This is not so, however. He does it by some mathematical process, as he as readily answers about dates the days of the week of which he has never seen. What this process is he himself cannot explain.

Scarcely any of the above will seem credible, but we assure the readers of the *Commercial* that it is true in every particular, as scores of those acquainted with the circumstances can testify. The lad is, we repeat, one of the most wonderful in the world, and his career will be watched with interest.

Effects of the Yellow Fever Panic.

The Chicago Commercial Report estimates the loss to the provision trade already, in consequence of the yellow fever blockade at Memphis and the depression in prices $1,500,000. Large quantities of pork and bacon which were intended for sale at the South, and would have been sold there but for the fever, will now have to be carried over into the new season. This fact has a material effect upon prices, which are already as low as the cost of production will warrant.

CHILI AND PERU.

THE LATEST NEWS FROM THE SEAT OF WAR.

Movements of the Belligerents—More Talk of Chili's Intentions—Peru's Vessels.

PANAMA, July 15.—The steamer from the South does not bring any war news of importance. The Lima correspondent of the *Star and Herald*, under date of July 2d, says: "As was surmised, the story of the Bolivian General Campero's encounter with the Chilian forces at Calama, on the River Loa, proved to be entirely false. The last accounts from Arica and Tacna, where the bulk of the Bolivian contingent is still quartered, with a large force of Peruvian troops, state that Generals Daza and Prado were still busily engaged in perfecting the organization of their men. The Chilian vessels, with the single exception of the Pisagua affair, have kept particularly quiet. The two corvettes O'Higgins and Chacabuco were reported in Valparaiso for repairs, the Abtao and Cochrane on the blockade at Iquique, and the Blanco Encalada with the Magallanes at Antofagasta, protecting a large fleet of transports gathered together at that place.

"THE GRAND COUP."

"It appears to be the opinion of the commanders in the South that the government at Santiago, possibly urged on by outside pressure, is meditating a descent in force on the Peruvian coast, perhaps at some point between Mollendo and Arica, thereby hoping to destroy and render inefficient the heavy divisions of the Peruvian army stationed much further south, in the province of Tarapaca, near to the boundary line of Bolivia. Nothing further has been accomplished by Admiral Rebolledo since the Pisagua bombardment. The Blanco Encalada, his other ironclad, was at Autofagesta at last advices, protecting the landing of troops from Valparaiso. A descent on the Beruvian coast at some point near Ilo is anticipated, but General Prado, at Arica, has the coast pretty well defended and fortified. A large portion of the Bolivian contingent has already been sent to Iquique and Tarapaca; but we know nothing regarding the whereabouts of General Campero, who with an excellent column of Bolivian troops, 3,000 strong, was marching down from the interior to take the Chilian advanced posts at Calama and Chiu-Chiu in the flank.

THE PERUVIAN VESSELS.

"The Peruvian squadron is still at Callao. The Huascar, thoroughly painted and scraped, came out of dock recently and has received the solid steel shot brought by the Talisman, of which she stood in such need. The work on the boilers of the Union is nearly completed, and the monitors are reported to be in good order. Still, discretion is the better part of valor, and after the unfortunate loss of the Indepencia, Peru cannot risk her remaining vessels against overpowering forces, as would be the two Chilean iron-clads, more especially as there are no reserves to draw upon. The *morale* of the navy is excellent.

PERU'S STRENGTH.

"The Peruvian colony in Paris has subscribed £100,000 for war expenses, but, unfortunately, we hear of no ironclad having been purchased. Lima has an effective army, composed of fully eleven thousand men of all arms. A severe blow has been given to private interests throughout the Republic, but principally in Lima, by the decision of the Nitrate Company to suspend the payment of interest on the bonds issued by the government in payment for the Nitrate Oficinas."

ARRIVAL OF MRS. POTTS,

The Pedestrienne Arrives in the City and Puts up at the City Hotel.

New Orleans Times, 21st.

Mrs. Potts disappointed the New Orleans public yesterday, but she couldn't help it. She was expected, as per announcement, to arrive in this city at half-past five o'clock, and that being a convenient hour nearly half of the third district turned out upon Fields street to welcome the pedestrienne.

The appointed hour came and went but Mrs. Potts lingered. Suddenly, about half-past six o'clock, a violent rain and thunder storm came up from the northeast, and the crowd had to hasten under shelter. The rain fell for about three hours.

By that time the spirits of all were effectually dampened, and the sightseers came to the conclusion that they did not care whether Mrs. Potts came in or not.

The plucky little woman arrived at 11 o'clock last night, however, and took quarters at the City Hotel. On Saturday night she stayed at the custom-house station at Lookout, the guest of Inspector Walker.

She left there about half-past 8 o'clock Sunday morning for the city, having thirty-six miles to make to the head of Elysian Fields street. The morning excursion train passed here at ten minutes after 9 o'clock. She continued her walk as far as Michoud, twenty-four miles, where she arrived at 6 o'clock. She waited at this point for the incoming excursion train, which she boarded at 10 o'clock and came to the city in the palace car.

Mrs. Potts would have walked clear into the city to the hotel but for the severe storm of rain and thunder. There was no occasion for her to do this however, as she claimed that her contract was completed when she entered the city limits, which extend to the Regolettes. She said her backers would be satisfied, and nobody else had any right to complain.

Mrs. Potts is a very small woman, weighing only ninety-nine pounds. She is a very pleasant little body, with auburn hair, bright blue eyes, and as handsome a set of teeth as any woman in the world cold wish. Her features are rather sharp, and her mouth and chin indicate that resolution and decision of character which a young woman must have felt when called upon to exercise often on such a tour as that she has just completed. She is considerably browned with tan, but declares herself in excellent health, though up to ten years ago, the last time she was weighed, she had lost ten pounds of flesh.

She states that from the time she started she received nothing but kindness and encouragement from those she encountered on her walk. She met with no indignity or insult. She frequently passed gangs of tramps on the road, but she did not speak to them nor they to her. There is something in the lines around the little woman's mouth, however, that suggests that she is not the person to be trifled with. She said it was suggested to her to carry a revolver, but she was afraid she might shoot herself, and so declined the advice. She carried a short walking stick, like an umbrella handle—her only weapon or incumbrance.

It is a pleasant thing to say, however, that a lady can walk through the whole tier of Southern States to the Gulf of Mexico alone and unprotected without being insulted.

Mrs. Potts proposes to remain in this city until Wednesday morning, then she will start upon her return trip and calculates to average twenty miles a day. She will give an exhibition Tuesday night. Though coming into New Orleans in midsummer, she has no fears of her health. She prefers to do her walking between 10 o'clock and 2 in the day, and has found the heat less oppressive than in the north when she first started out. She will return the way she came till she reaches Danville, Va., when she will deflect to Richmond and Fredericksburg.

As soon as the news of her arrival was received, the parlors assigned to her by the landlord of the hotel were thronged by an interested audience, with whom the little lady chatted gaily, apppearing not the least fatigued by her long walk.

"OLD SI."

He Takes a View of the Ohio Campaign Prospects.

Old Si came in yesterday morning with a new thermometer, longer and more ample than his old one.

"I feels cooler alreddy, but still I's hot arter sum infermashun jess now."

"What is it you want to know?"

"How am de Ohier campane gittin' on, an' how fer is hit got ter?"

"Well, it's pretty warm already, and the eyes of the Union are centered on the result."

"Jess so; dat's de pint I wuz gwine ter cum ter. How do hit happen nower-days dat Ohier am de ballunce wheel ob de country? Why ain't Rode Ilum or Orregum jess ez lierbul ter slew 'round an' lead de dance or while ez Ohier?"

"Why, you see, Ohio is—well, she's sorter—the fact is which ever way Ohio goes things are doubtful anyhow!"

"Dar! dar! Ain't I done sed long time ago dat Ohier warn't gwine ter do ter tie to! Now, you'se got it down whar er man dat runs fer presydent mus' go 'round fightin' an' skirmishin' from New Yawk to Ohier and back agin 'fore he kin get er bet laid on him!"

"Well, Ohio is the pivotal State now, and if Ewing gets elected, we are pretty sure to win in 1880."

"So I'se heerd! Mister Ewin' ar' er pow'ful nice man, an' orter hump bissef mon'strous peert durin' dese summer days. Dis are his life ride, an' he better win de pot or he's gone up, fer er fack! Tarboro *Southerner* says that Mr. Geo. Howerton was terribly bitten and torn by two (untaxed) bull dogs. The corn crop is almost destroyed and cotton is seriously retarded.

Ore-Knob Copper Mine.

Statesville American, 24th.

Yesterday the Ore-Knob Copper Company cut into a large body of rich copper ore, sixteen to eighteen feet wide, and assaying as high as thirty-three per cent. There are already several thousand tons of first class ore exposed, and the discovery promises to be the most valuable and important of any ever made in any of the southern mines. The company propose, as soon as the railroad from Greensboro to Ore Knob, now being built, is finished, to erect the largest copper works of any in the country. At present their pay-roll exceeds one thousand dollars per day. It now requires four large engines kept in constant use, to perform the work; the largest being an eighty horse-power, which is located at the main shaft. From this shaft we raise upon an average of ninety tons of ore per day. In a few months we will see a new engine in full operation at the new shaft, hoisting equally as many tons of ore as we now realize from the main shaft. We hope this is but an entering wedge in the development of the rich mineral wealth that North Carolina holds in her bosom.

[This property, one of the most valuable mining properties ever developed in North Carolina is located in Ashe county and is owned by Baltimore and New York capitalists. It is managed by J. M. Clayton, of Baltimore, one of the owners, who, though a very young man, about thirty years old we believe, is one of the most successful operators in the United States. The writer spent several days at the mine last fall, and at an early day will write out the impression of that visit.] ED. NEWS.

The Crisis in England.

LONDON, July 25.—An Oldham correspondent of the *Daily News* says: It is generally supposed there will be an endeavor after the annual holiday in August, to bring the short time movement under something like regular system, and the co-operation of all concerned will be sought. Even masters admit that it would be absurd to seek a remedy for the depression in business by calling upon operatives to submit to a further reduction in wages. Published accounts of some of the Oldham limited companies show that hardly any of them have made any profit for the last two years, and with some the adverse balance is so heavy that even with a good trade it would be almost impossible for them to make a profit perhaps for years to come. In limited companies alone two million pounds of capital has been lying unproductive for three years. One hundred and twenty thousand pounds of debt. A 20 per cent. reduction in operatives' wages. Mills running on short time or closed. Numerous failures and a decrease of 50 per cent. on value of house property. These are some of the leading facts connected with the history of the Oldham cotton trade.

CHEAP TRANSPORTATION

THE COST OF DRAWING DEAD WEIGHT SET FORTH.

Improved Freight Cars---The Weight Greatly Reduced Without loss of Strength or Durability.

Boston Post.

About four years ago we gave a detailed description of a patent freight-car which reduced the dead weight hauled by railways over one-half. These cars cost no more than the ordinary standard freight-car, because the principles of construction are simple and of course inexpensive. They have been indorsed and their use recommended generally by the most eminent mechanical engineers and master mechanics in this country and in Canada. These cars have been thoroughly tested during the last five years as to utility and durability, and one of them may be seen running on the Fitchburg railroad, weighing only 10,600 pounds, built in 1875. It is claimed by those interested that this car reduces the cost of transportation more than one-third, and that its general use throughout the United States would save annually, by the reduction of dead weight hauled, at least one hundred and sixty millions of dollars, a sum (now thrown away annually by the present management and their system of rolling stock) which would pay five per cent. upon the legitimate cost of all the railways in the United States. It would equip all the railways in the country with improving rolling stock, or it would construct and equip 10,000 miles of railway in the southwestern States. It is also asserted that the principal cause for the depression in railway securities, as well as their "earnings," is not from the decrease in freight and passenger rates, but from the gradual increase of dead weight hauled. As proof, the report of the railroad commissioners of Massachusetts of 1878 is cited, which shows that in this densely-populated district the dead weight hauled by seven of the principal roads for each passenger carried was two and one-fourth tons, and for each ton of freight carried, the dead weight amounted to two and three-fourths tons. On the Boston and Lowell the dead weight hauled for each passenger carried was 3.5 tons, and for each ton of freight four-sixth tons. The average dead weight hauled in the United States for every ton of freight carried amounts to ever six tons. The advocates of the improved system of rolling stock contend, and we must acknowledge with apparently good reasons, that no railway company can afford to haul about such an amount of dead weight as the standard car compels them to do, and that at the end of two years money would be saved if they substituted the improved freight car and threw the old cars in the "ditch" or burned them up. By adopting the improved car the locomotive will carry for the same running expenses one-third more paying freight, and it is believed the time has arrived for railways to charge for the weight hauled over their roads, including the car and its contents. Car loads are wrong in principle, as well as in practice, and the sooner this system is abolished the better for stockholders. Such startling statements as these demand the serious consideration of all our railway men, and the most careful consideration of capitalists and merchants.

A company has been formed in this city to build these cars, under the style of "The Cheap Transportation Car Company;" capital, $1,000,000—J. M. Vernon, Esq., president, and the Hon. H. C. Bacon, secretary and treasurer. A line of these cars is to be put on as soon as possible between Boston and the West, and a line between Boston and Montreal.

Seven Stages of Drunkenness.

All the world's a pub,
And all the men and women merely drinkers:
They have their hiccups and their staggerings,
And one man in a day drinks many glasses,
His acts being seven stages. At first the gentleman,
Steady and steadfast in his good resolves;
And then the wine and bitters appetiser,
And pining, yearning look, leaving like a snail
The comfortable bar. And then the arguments,
Trying like Hercules with a wrathful frontage
To refuse once more two-penn'orth. Then the mystified,
Full of strange thoughts, unheeding good advice,
Careless of honor, sodden, thick and gutt'ral
Seeking the troubled repetition
Even in the bottle's mouth; and then quite joyful,
In fair good humor while the world swims round,
With eyes quite misty, while his friends him cut,
Full of nice oaths and awful bickerings;
And so he plays his part. The sixth age shifts
Into the stupi i slipping drunken man
With "blossoms" on his nose and bleary-eyed,
His shrunken face unshaved, from side to side
He rolls along; and his unmanly voice
Huskier than ever, fails and flies
And leaves him-staggering round.
Last scene of all,
That ends this true and painful history,
Is stupid childishness, and then oblivion—
Sans watch, *sans* chain, *sans* coin, *sans* everything.

The Drought in Virginia.

Richmond Dispatch.

The fall of 1870 was a time of drought and also great floods. The James rose from what was then regarded as its least to its greatest depth. In July, 1872, there was another great drought. On many of the railroads the tank-wells gave out, and supplies of water were with difficulty obtained. And again, in the fall of 1877, the drought was very severe, and the James repeated its exploit of 1870—swelling from a small, clear stream into a great yellow flood.

Mr. James L. Davis, Superintendent of the Water-Works, states that the river is now lower than he has known it to be within forty years. The serious decline commenced about the 10th of July, and the river has of late been falling at the rate of about an inch a day. It is now about six inches below the level of the stone dam. The pumps are just moving. The turbine wheel is able to make but four strokes a minute, and the other wheels three. The pump-house raceway, is thirty-six inches below the usual level. The reservoirs are only about half full, though the steam-pump has been at work for a week.

Mr. Davis said yesterday afternoon, as he looked out anxiously at the half-clouded sky, "Unless we get rain in eight or ten days the hills of the city will be without water."

The accounts daily received from the adjacent counties report the condition of affairs consequent upon the protracted drought as being very alarming. The corn in many localities is not more than knee or waist high, its tassels dry and leaves twisted. The farmers are apprehensive of a lack of bread: Even with rains now a short crop would be made. The forest trees are dying in some sections for want of moisture, the streams and springs have failed and wells are drying, and the cattle have to be fed in their pens. Old farmers say that such a condition of things has not been known for thirty or forty years.

CHARLOTTE DISTRICT CONVENTION

In Session in Concord---"News" by the Way.

Correspondence of the News.

CONCORD, July 24.—After a long and dusty ride from the eastern part of the State we reached this place early this morning. A comfortable and pleasant home was assigned us with the able and popular solicitor of the Sixth Judicial District, Major W. J. Montgomery.

As I passed Raleigh I fell in with that judicial brother of the quill, Rev. F. L. Reid, who was my companion as far as High Point, where I stopped at that pleasant way-side resting place Barbbee's Hotel. The cry all along the road is "the dry weather is distressing." But to-day in this place and locality there was a good rain and I am hopeful it was general.

In the conference I found everything well under way, with Dr. W. H. Bobbitt, the Presiding Elder, in the chair, and C. G. Montgomery, Esq., as Secretary. All the preachers in the district were present except Rev. Ira T. Wyche and Rev. O. J. Brent, both detained by sickness.

Rev. L. E. Stacey preached the opening sermon to day at 11 o'clock, from 8th chapter Proverbs and part of 36th verse. Subject: Man is the author of his own destruction.

Rev. T. H. Campell is announced to preach to-night. N. M. J.

Profitable Farming.

Statesville American, July 24th.

Mr. S. A. Lowrance, of Back Creek, Rowan county, sowed 48 acres of land in wheat, and made eleven hundred and eighty (1180) bushels. On the above land he used three (3) tons of Peruvian guano. While there I asked him to give me his expenses on his crop, which he kindly consented to do. He said he would take two fields which measured together 23½ acres, on which he made 696 bushels of wheat, which is about 30¼ bushels per acre. The expenses were as follows:

Preparing land, 23 acres. @ $2,	$ 46 00
Drilling same, @ 50c.,	11 50
28¾ bus. wheat, @ $1,	28 75
2 tons Peruvian guano, @$60,	120 00
1 ton Lime,	12 50
1 ton Salt,	12 50
Harvesting,	15 00
Threshing,	40 00
Total expenses,	$286 25
Taking his wheat at $1 per bushel it would be	$696 00
Total expense in making crop,	286 25
Profit of 23 acres of land,	$409 75

In addition to the above he has a fine stand of clover, one field of which he will cut this fall.

Included in the above expenses is drilling $11.50, harvesting $10; both of which he did himself with his drill and reaper and one team of horses.

To show the difference between having your land in good condition, using machinery in putting it in and taking it off, and using guano, I threshed a crop this season where there were fifty-five bushels of wheat sowed in the common way, and it made three hundred and thirty-six bushels, which is about six bushels to the acre, and that is considered a fair yield. Eleven acres put in as Mr. Lowrance did his would have made the above amount, with about one-fifth the expense, excepting guano. Yours, etc.,

W. L. GILBERT.

Elmwood, Iredell county, July 12th.

It may hurt the feelings of the Greensboro *North State* to know that Mr. Gilbert is a Northern man. He has lived in Iredell county for several years past, and is an industrious, useful and highly respected citizen. His politics, doubtless, are Republican, and we know that the Iredell people permit him to enjoy his republicanism to the fullest extent. They are a liberty-loving people up there. But why attempt to overtake the *State's* lies?—ED. NEWS.

Wheat Market.

Baltimore Sun, 25th.

The movement in wheat here for the week ended yesterday reached very large proportions. The sales recorded at the Corn and Flour Exchange aggregated 5,000,000 bushels, equal to twelve months' business a few years ago. The receipts were 1,226,000 bushels, and the shipments 1,028,413 bushels, showing that the wheat goes to Europe as fast as it arrives here. The stocks of wheat and corn are about 1,600,000 bushels, with an elevator capacity of 3,500,000 bushels. For the two weeks from July 10th the wheat sale shere have been 9,000,000 bushels, including that on the spot and for future delivery. The value of all foreign exports the past week was $1,616,661. The activity in wheat has created a demand for vessels, and freights have considerably advanced.

GAINS IN GRAIN.

It is estimated that six countries in Europe will this year be compelled to buy three hundred million bushels of wheat, and that France and England will need three-fourths of this quantity, while France's share alone will cost her one million of francs, or a fifth of the sum of her famous ransom. This means prosperity for the American farmers.

A Wonderful Person.

From the Jersey City Argus.

Mr. Tilden, who is said to have no strength at all at the East, is said to pull stronger than the bulls of Bashan at the West. That is just like Mr. Tilden. While in one State he resembles a limp dish-rag, in another he is a granite column. Take him for all in all he is the most remarkable man the world e'er looked upon.

A Hayes' Movement to Order.

Atlanta Constitution.

All the indications are that Mr. Hayes is ambitious of a second term. This able man needs no boom. He has only to supply the amiable Rogers with a bucket of warm paste and a whitewash brush, and the deed is done.

BOILER EXPLOSION.

A MAN THROWN 30 FEET IN THE AIR AND INSTANTLY KILLED.

Two Others Scalded to Death. An Awful Accident at Enfield, Halifax County.

Special to the News.

WELDON, July 25.—A most awful and distressing accident occurred at Enfield, on the Wilmington & Weldon railroad this evening, resulting in the death of three men. At 5 o'clock this p. m., the boiler attached to the wood and grist mill belonging to Mr. Ellis Levy at Enfield, exploded, killing Mr. Robert Partin instantly, and two negroes were badly scalded and died within an hour after. Parts of the boiler, weighing twelve or fifteen hundred pounds were blown two and three hundred yards. The body of Mr. Partin was thrown thirty yards distance, and was terribly broken and mutilated. He leaves a wife and three children. He was a member of the Knights of Honor and will be buried this p. m.

THEO.

Close of the Normal School.

Correspondence of the News.

CHAPEL HILL, July 24.—The Normal School was formally closed to-day by Superintendent Ladd. Governor Jarvis, who was billed for this part of the ceremony, was prevented by sickness from coming.

The exercises to-day consisted of a debate by delegates of the Normal School Debating class and of essays.

The speeches were very creditable indeed, and reflected much honor on the Normal School and its professors.

The present session of the school is pronounced the most successful of all. Not so many persons have attended as last year, it is true; but those who came are *bona-fide* teachers, and they came for hard work, consequently more hard work has been done, and the course of instruction was fuller.

The town is all astir this evening. The Normalites are going off in large numbers. Everybody is pleased and nearly all say they are coming back.

The Legislature deserves great praise for making the appropriation to the School perpetual. In no better and more direct way could so much good be done to the educational interests of the State.

ANON.

Significant Signs.

Cotton is indeed no longer king. The statistics for the eleven months ending May 30th show that for the first time in the history of the country the exportation of breadstuffs has exceeded in value not only that of cotton, but of cotton and tobacco combined.

The accounts of the Postoffice Department agree with countless other business barometers in marking the return of prosperity. The receipts at the various postoffices throughout the country for the first quarter of the year have just been footed up, and reach the enormous sum of $7,930,000, being the largest quarter's receipts in the history of the government.

The weather for the past few weeks has been very profitable to the farmers, who have been gathering their hay crop, which, in the Eastern and Middle States especially, is one of the heaviest ever cut, so that hay is now low in price and excellent in quality. The promise of the other crops is generally flattering throughout the country, but in some States agriculture has suffered to a degree from too abundant rains. The outlook, however, is that the harvest of cereals will be exceptionally large, both because of the great acreage planted and because of the average healthy condition of the crop.

Short grain harvests in France and in England assure us of a foreign demand for our surplus of the cereals, which will enable us to dispose of these crops at remunerative prices; and the consequence must be the further advance of all the business interests of the country.

When we hear that the manufacturing interest is generally in a satisfactory condition, the mills and machine shops, as a rule, working up to full time with a full force of labor, we get a sign of the renewed prosperity of trade which is unmistakable. Another indication is afforded in the large decrease of the number of business failures for the first half of the year as compared with the corresponding period of 1878 and the four previous years.

The Truth Pun gently Put.

Charlotte Democrat.

All the bitterness that prevails of any sort is in the Northern section and among Radicals who have swindled the public treasuries and are now a nuisance to *good* people in their respective localities; they are the only class among whom bitterness prevails, and they are now exasperated because they are about to be turned out of office. The "ex-rebel officers" alluded to, and the people of the South generally, are the truest and best friends the Government of the United States has, and the day will come when good men everywhere will look to them to save the Government from the destructive hands that have had control of it for so many years past. The day will come when the good people of the North and property-holders generally, will invoke the aid of Southern men (ex-rebel officers included) to save them from the ruin threatened by "communists" and "strikers" and the turbulent element which is fast gaining the upper hand in Northern and Western cities and States.

Raise Good Tobacco.

In the Glasgow (Ky.) *Times* we find a very sensible article headed "Money in Good Tobacco," written by Mr. William Bybee, of Springhill, Ky. We reproduce and commend to our readers engaged in tobacco raising the following extract from his letter:

Raising tobacco is a matter that but few men understand. A man that understands making tobacco and handling it right, and makes money by raising it, never overcrops himself and never plants it on land that will not produce a paying crop. One good hogshead of tobacco, at this time, will bring more than three mean hogsheads will bring. Why men will overcrop themselves, and plant tobacco on poor land is a little strange to me. A man should never plant tobacco on land that will not produce one thousand to twelve hundred pounds per acre. The important point in this letter for the people to learn, is to raise less tobacco, and what you do raise let it be good, then it will pay you for raising it.

Rains in Virginia.

FREDERICKSBURG, July 25.—Rains in north Virginia to-day have put an end to the unprecedented drought which has prevailed for nearly two months and threatened total failure of the corn crop in large districts.

Death of an Old Merchant.

SAVANNAH, July 25.—John Stoddard, one of the oldest and most prominent citizens of Savannah, died here to-day, aged seventy years, after an illness of seven months.

DAILY NEWS

HUSSEY & JORDAN, PROPRIETORS

JOHN B. HUSSEY, - - Editor.

SATURDAY, - - - - JULY 26, 1879.

THE AGRICULTURAL DEPARTMENT.

The NEWS is not hostile to this department. In the interest of State agriculture the NEWS last winter earnestly defended the department and combated the iron-jawed retrencher at every step. It was the efforts of the NEWS that saved the department from the insatiate maw of the "Reform Legislature." It will make the same fight again for the farmers. With this record the NEWS can afford to call attention to the following semi-official statement made by the *Farmer and Mechanic*:

We have neither time nor space to answer our correspondent fully this week, but we learn from the State Auditor's books that the sums paid by the State Treasurer to the Board of Agriculture are as follows:

From April '77 to Sept. 30, '77,	$ 5,600.85
From Sept. '77 to Sept. 30, '78,	17,127.50
From Sept. '78 to July 1, '79,	18,500.50
	$ 41,228.85

Including the large sums ordered by the recent meeting of the Board (part of which might have been easily saved) the total will run to about fifty thousand dollars for the brief period of two years, or thereabout.

Have the farmers of North Carolina derived fifty thousand dollars' worth of benefit? The subject deserves discussion.

The *Farmer and Mechanic* is the accredited organ of the Agricultural Department. The shortcomings of the department we shall expect to see laid open to the public. The *Farmer and Mechanic* can confidently count on the hearty co-operation of the NEWS.

THE Greensboro *Patriot* effectually disposes of the *North States'* slander. The editor of the *Patriot* is a northern man. He says:

"The *North State* publishes a list of Canadian and Northern settlers in this State who have left the State and gone elsewhere within the past few years. Politics had nothing to do with the going of these people. Some of them went because they were disappointed in their expectations having bought poor land for little money which they hoped to make rich and productive by their improved system of cultivation. Disappointed in this they became disheartened. Others located in unhealthy sections where they became the victims of chills, fever, etc., while others, who liked the country and were succeeding, did not enjoy the school facilities which they wished for their children, living as they did in thinly settled localities, and for this they left. We knew many of these people personally, and learned their reasons for leaving, as we give above. We did not know them all and consequently we cannot speak for all but such as we did know politics had nothing to do whatever with their action."

KEOGH says the Republicans can carry the State if properly organized.

Everitt says the party will be everlastingly damned under Keogh's chairmanship and management.

What does the man who holds Western North Carolina in the hollow of his hand say?

Will he longer submit to Keogh's dictation?

Will Mott stand off unconcernedly and see his party go to the dogs without one effort to redeem it.

Where is Goodloe and Haines and Dula and Barringer and Bynum and Read and Rodman and Humphrey and Holden and Badger?

Will these men allow Keogh to lead them by the nose into the Grant-Blaine camp.

The strength of the Republican party is not to be underrated. Organized thoroughly with a man in the lead, commanding the confidence and respect of alienated Republicans, with Sherman's money bags placed where they will do most good, the Republican party would give us serious concern. We can profit by the exercise of a little wisdom.

IT is the season for the average Congressman to be interviewed on the "Presidential Outlook." The Cincinnati *Commercial* has recently pumped Chalmers, of Mississippi, and Mills, of Texas. They both express anti-Tilden sentiments. Log-rolling anti-Tilden politicians had no little to do with Mr. Tilden's St. Louis nomination. It is Tilden's Democratic hard money theories that Chalmers and Mills dislike. They either voted for or against the Electoral Commission. If against it it was in defiance of the Democratic party, and they have no right to speak for the party. They voted for it and their mouths are closed. What "backing down" was done can be set down to the credit of a Democratic Congress of which Chalmers and Mills were distinguished members. That is the truth and all the twisting will never make it otherwise. We advise the anti-Tilden Democrats to antagonize his nomination on some ground that does not involve their own stultification.

THE Elizabeth City *Economist* enters as "starters" for the next Congressional race in the 2d district, Louis Latham, Jesse J. Yeates, James Edwin Moore and Judge Eure, with chances in Latham's favor. Martin's vote on the army bill, the one patriotic act of his late political life, has incensed the Republicans in that district and they will probably concentrate on ex-Judge W. A. Moore. The district will not be at a loss for the best sort of material. It has been ably and faithfully represented in the past and when it redeems its character from the disgrace of Martin's accidental election it will come to the front again.

EWING'S Lancaster speech shows a carefulness of preparation that has not hitherto distinguished his efforts in Congress. The speech was submitted to leading Democrats, carefully pruned and revised, printed and sent to the leading newspapers in the country before its delivery. The NEWS received a copy through manager Starke, and though too late for any liberal use of it in yesterday's paper, is none the less thankful to the obliging and efficient anager of the Western Union.

ON every page of the Congressional *Record*, now at hand, thanks to our excellent representative, Captain Davis, we find a conclusive answer to Sherman's bluster and blarney at Portland about "resumption."

Sherman is welcome to all the credit that belongs to him in bringing about so-called "resumption"—and that is very little. The war of extermination the people are waging against the Money Power is not to be fought on the line of "resumption." Sherman will find that out, sooner or later.

PERHAPS the Goldsboro *Messenger* guessed at the NEWS' position on "the newest feature of the North Carolina system." The NEWS tried to make plain its position to wit;—well, if the intelligent editor of the *Messenger* will *read* the NEWS' editorial (Tuesday) a prompt *amende* we feel sure will be made. The *Messenger* is careful not to quote a single word from the NEWS to sustain its interpretation of our position. After trying hard to avoid a go-between position the NEWS finds itself perched high on the fence. Really there is a good joke in this thing somewhere.

The meed of praise bestowed by Col. Jones, proprietor of the Charlotte *Observer*, on J. P. Caldwell and J. L. Chambers was truly, gracefully and handsomely deserved and given. What these boys don't know about slinging ink, or flourishing a Faber, it would be frittering one's time away needlessly to attempt to learn.—*Tarboro Southerner.*

A richly merited compliment which the NEWS has never been slow to acknowledge. Caldwell and Chambers, though young journalists, are old friends of ours.

EWING made the same speech at Lancaster, Ohio, Thursday evening that he has several times made in Congress. Coming from any other State than Ohio Ewing would be an average politician. Ohio newspapers are enterprising, and they are well paid for advertising politicians.

NORTH CAROLINIANS at the head of the University, Wake Forest and Trinity colleges makes glad the big North Carolina heart of the Charlotte *Democrat*. But it is a great loss to the church to lose from the pulpit such a man as Pritchard.

THE *Messenger's* insinuation of fear, after the display of courage the NEWS has made in discussing "the newest feature in the North Carolina system," provokes us no little. Why the *Messenger* should so needlessly prick our vanity we do not understand.

JOE MARTIN has gone to California. The impression in the 2d District seems to be that Yeates has a walk-over-case and will be able to occupy his seat in the 46th Congress at an early day in the session.

THE Wilmington *Star's* railroad correspondent writes over the familiar *nom de plume* of "Junius." His identity may be a question hereafter. At present no great concern is felt.

MATHES, of the Winston *Sentinel*, spent a few days at Beaufort last week. On his return to the sanctum he prints an original poem on "man's relations to woman."

GENERAL LEACH in his speech at Hendersonville said the Governor of South Carolina was the handsomest man on the grounds except himself. —*Charlotte Free Press.*

INSTANT and ignominious death to the man who spells it d-r-o-u-g-h-t. Two printers in the NEWS office have suffered the penalty.

MILTON scores a victory over her dogs. The contest was close but the race was to the strong this time.

BRAGG issues the *Free Press* now as a daily. It is a bright, crispy sheet, newsy and lively.

Whisky produces heat; heat, profanity.—*Tarboro Southerner.*

MRS. HANES, a Davie county widow, has just harvested 800 bushels of wheat.

Now hear that mouthy (Reidsville) *Times*:

How would Governor Alfred M. Scales sound? Not that we are agitating—but merely notice that his name is carefully shied around in certain quarters. Put him on your "list," boys. He is a good fig. The people think so.

The Richmond *Dispatch* is absolutely certain that Secretary Sherman can control the solid South in the next Republican convention.—*Washington Republican.*

We are "absolutely certain" that Mr. Sherman can secure the 138 votes of the Southern States in the Republican National Convention, if he chooses to order all the treasury officials in the South to work for him, and if the President and the other members of the Cabinet are all willing that he shall be nominated. When, therefore, we set down the 138 votes of the South as solid for Mr. Sherman's nomination, we do so with the understanding that the two "ifs" above interposed are facts.—*Richmond Dispatch.*

[The *Dispatch* makes a knock-down argument. It is hard to get over or under. The merest creaking of the crib door sets every Republican official to whickering.]

John Sherman's Mistake.

Cincinnati Enquirer.

Mr. Secretary Sherman has gone to Maine, leaving an important thing undone. He has omitted to read the Glover report on the mismanagement of the treasury.

At least he said that he had not read it, and his silence in regard to the charges made in it confirm his declaration.

This is a grave error on Mr. Sherman's part. He is to-day the head of the treasury department, and responsible for its good name.

The Glover committee's report charges that the treasury has been used to promote stock-jobbing operations.

It charges that counterfeiting of the greenback currency has been carried on with the connivance of treasury officials.

It charges that an officer of the mint has been bribed.

It charges that the money of the treasury has been used to corrupt the elections.

It charges that there is a discrepancy of many million dollars, for which either Mr. Sherman or his predecessors in office are responsible.

All these are not simple allegations, but they are supported by sworn evidence of men who were employees in the treasury and familiar with its transactions.

Talbott's Patent Spark Arrester.

THE INVENTION OF THE AGE.

Talbott's new Patent Spark Arrester is really the only perfect and reliable one, and is superseding all others in use. The great efficiency of this Arrester is attracting universal attention, and is being endorsed by the best mechanical engineers and insurance companies. Its prominent features are:

It does not destroy the draft.

It does not interfere with cleaning the tubes.

It will not choke up, and requires no cleaning.

It requires no direct dampers to be opened when raising steam (dampers being objectionable, as they may be left open and allow sparks to escape.)

It requires no water to extinguish sparks, which, by condensation, destroys the draft. Besides, when water is used, if neglected, the efficiency is destroyed by evaporation of the water, and the boiler is kept in a filthy condition.

It is simple and durable, and can be relied upon.

It can be attached to any boiler.

No planter should be without one of them. Insurance companies will insure gins and barns where the Talbott Engines and Spark Arresters are used at same rate as charged for water or horse-power.

Send for illustrated circulars and price list.

Unspoken.

I may not keep thee, dear. I long have known
An hour must come for farewell look and sigh;
An hour wherein love-blossoms that have blown
Around our path, like summer flowers must die,
And I have communed with my wakeful heart,
And thought of all that I would say to thee,
Ere hand and lip from hand and lip should part.
And oceans roll between my love and me.
But as we stand upon the moor to-day,
The gorse and purple heather at our feet,
I have no spirit left in me to say
The words I meant to be so strong and sweet;
No eloquence to help me at my need,
No words of fire to thrills last "God-speed!"

Yet standing thus beneath September's sky,
With solitude around us, God above,
We feel, with precious moments fleeting by,
That silent farewell better suiteth love.
No honeyed phrase can ease the cruel smart
Felt with the stroke fate dealeth us to-day.
I read each longing of thy tender heart,
Thou knowest all I would, but cannot say.
I do not bind thee by a parting vow,
Thou speakest not of faithfulness to me;
It is enough to be together now,
Ere yet be tween us rolls the mighty sea.
Silent, alone, among the moorland flowers,
Passeth the last of all our happy hours!

—*All the Year Around.*

A Good-by.

Falling leaf and fading tree,
Lines of white in a sullen sea,
Shadows rising on you and me—
The swallows are making them ready to fly.
Good-by, Summer! Good-by!
Good-by!

Hush! A voice from the far-away!—
"Listen and learn," it seems to say,
"All the to-morrows shall be as to-day,"
The cord is frayed and the cruse is dry,
The link must break and the lamp must die.

What are we waiting for? Oh! my heart,
Kiss me straight on the brows and part!
Again! Again! My heart! My heart!
What are we waiting for, you and I?
A pleading look—a stifled cry,—
Good-by, forever! Good-by!
Good-by!

TUTT'S PILLS CURE CONSTIPATION.
TUTT'S PILLS CURE PILES.
TUTT'S PILLS CURE FEVER AND AGUE.
TUTT'S PILLS CURE BILIOUS COLIC.
TUTT'S PILLS Cure KIDNEY Complaint.
TUTT'S PILLS CURE TORPID LIVER.
TUTT'S PILLS IMPART APPETITE.

DR. TUTT has succeeded in combining in these pills the heretofore antagonistic qualities of a STRENGTHING, PURGATIVE, and a PURIFYING TONIC.

Their first apparent effect is to increase the appetite by causing the food to properly assimilate. Thus the system is nourished, and by their tonic action on the digestive organs, regular and healthy evacuations are produced.

The rapidity with which PERSONS TAKE ON FLESH while under the influence of these pills, indicates their adaptability to nourish the body, hence their efficacy in curing nervous debility, melancholy, dyspepsia, wasting of the muscles, sluggishness of the liver, chronic constipation, and imparting health & strength to the system. Sold everywhere.

BUFFALO LITHIA WATER,

As a General Remedial Agent in Chronic Diseases.

It is confidently claimed for these waters, and the claim though a strong one is substantiated by the testimony of many of the most eminent medical men of the country, both North and South, that in the following enumerated diseases: Affections of the Kidneys and Bladder, especially in Stone or Gravel, Dyspepsia, Rheumatic Gout, Rheumatism, Paralysis, Malarial Fevers in their chronic form, Dropsical Effusion, Uremia or Uremic Poison, Chronic Cutaneous Eruptions, and in the Functional Diseases peculiar to Women, more especially in al Disorders of the Menstrual Function. They have accomplished results as remarkable as were ever accomplished by any remedial agent whatsoever, whether in materia medica or among mineral waters. They are confidently recommended by some eminent medical men as a preventative of the disturbance and dangers incident to Pregnancy.

These waters, in cases of the dozen half gallon bottles, $5 per case at the Springs. Pamphlets sent to any address. Springs open for guests 1st day of June.

R. B. ANDREWS & COMPANY.—Local notice.

STRONACH & ALLCOTT.—Farming Machinery.

LOCAL BRIEFS.

——And still the people are begging for more rain.

——The school bill *mandamus* case has been set down for Thursday next.

——Keep your hogs penned up if you don't want to invest $1,25 with the pound-master.

——Old bonds to the amount of $15,500 were received at the Treasurer's office yesterday.

——Some of the aldermen wish that Mr. Fairchild would take Moore Square on the same terms that he proposes for Nash Square.

——Devereux Jewell was arrested at the instance of Rufus Dunn, for stealing harness. He was furnished quarters at the guard-house last night and will have a hearing this morning.

——The city geese, when the shower came up yesterday, set up a song of praise, and paraded the streets with colors flying and a band of music—at least it sounded as bad as a band.

——The culvert and gutter work in front of the Citizens' National Bank was commenced yesterday, but the rain drove the workmen to shelter before they had got it in shape to receive the water.

——The proprietors of the Pawtucket hair cloth factory, Pawtucket, R. I., have sent to Treasurer Worth for samples of reeds and coarse grasses that may prove useful for manufacturing purposes.

——Governor Jarvis, it is stated, says that he shall recommend in his next message the sale of the public squares, the city of Raleigh having failed to improve them and make them applicable for the purposes intended by the conveyance.

——A colored boy, some fourteen or fifteen years of age, named John Farrington, was run over by the cars yesterday near the North Carolina Railroad depot. He had been in the habit of jumping on passing trains and taking short rides, but this time he missed his hold and went under the wheels, one leg being cut off and the other badly mangled. He was living at a late hour last night.

——No quorum at the meeting of the Board of Aldermen last evening. Mr. Fairchild was present and explained his plan relative to the improvement of Nash Square, and had the lease drawn up subject for approval or rejection. Those of the "city dads" present were strongly in favor of approval. At present the Square doesn't present a very attractive sight, about the only improvement ever made having been done by private persons. The Board adjourned to meet Tuesday evening at 8:30.

How To Help the City.

Do you know of any nuisance in your neighborhood, or any condition of things likely to breed disease? If so you cannot do a better service to the city than by reporting the matter to the authorities at once. A little delay may prove serious.

Death.

Little Sudie McDaniel, a bright little girl, four years of age, daughter of James A. and P. S. Higgs of this city, died yesterday morning. Funeral 9 o'clock this morning from the family residence. Friends of the family are invited.

Mayor's Court.

Two youngsters, both colored, were hauled up, one for throwing powder in a little girl's eyes and the other for fooling with a pump and getting it out of order, were sent home to be flogged by their parents. It is proposed to put up a whipping post in the guard-house for the benefit of such boys, therefore the youngsters had better behave themselves or else they will form an acquaintance with Captain Lee's rattan—and a very nice one it is.

A delegation of colored draymen made their appearance as complainants against a chap charged with doing dray work without license. When sworn not a witness knew anything to substantiate the charge and the case was dismissed.

Then came a darkey who was in trouble about his wife. The Mayor gave him the needful advice, and tried hard to get shut of him, but he was a tough case and his Honor fled to the mountains of Hepzidam and there secluded himself.

A Relic of Former Days.

A NEWS reporter was shown yesterday a collection of old papers found among the effects of Sion Brown, who was well known to many of our older citizens. Quaint in form and orthography, they possess much interest as mementoes of former days, and doubtless would recall to the memories of his living friends many pleasing reminiscences. Receipts for faithful rendering of accounts wherein he had been a fiduciary agent; memoranda of various business transactions; old-time accounts, all aid in furnishing links in an interesting local history. Here is a document of forty years ago:

Sport Ahead.

Times have been so dull lately, nothing doing at all, that some of our city gentlemen have resolved to make an effort to break the monotony of the thing and start a general rally. Accordingly the Raleigh Jockey Club propose to have a field day on the race track at the Fair Grounds on the 14th of August. The programme of the day's sport comprises the following:

1st. Running race, half a mile and repeat. Purse $30: 1st, $15; 2d, $10; 3d, $5.

2d. Running race, one mile and repeat. Purse $50; 1st, $25; 2d, $15; 3d, $10.

3d. Trotting race, half mile heats, best three in five. Purse $30; 1st, $15; 2d, $10; 3d, $5.

4th. Trotting race, mile heats, best three in five. Purse $50; 1st, $25; 2d, $15; 3d, $10.

In the trotting races only buggy horses will be allowed to enter and will be driven to buggies.

Another feature of the day will be a walking match, two miles, go as you please, for a purse. This will give our local pedestrians a chance to stretch their legs.

The aggregate amount of the purses will reach $200, and a band of music will be in attendance throughout the day to brace up the sportsmen.

There will probably be some thirty horses present from neighboring counties, and all good stock, those entering coming more for the fun of the thing than for prizes. Consequently a good time may reasonably be anticipated.

Arrangements have been made with the different railroads by which they will furnish tickets at half rates, good for three days.

The Colored Ball.

One of the most fashionable events of the season occurred last night in the Myatt Opera House. A select assemblage of ladies and gentlemen of color congregated there, and the soul-inspiring strains of "Sally come up" and "Monie Musk" floated out on the midnight air, while the double-soled brogans (penitentiary make) kept time with music (a three-stringed fiddle and a broken-nosed banjo, (like brick hods in a new building. The lovely Miss Perkins, of Wilmington, was the belle of the ball, and was attired in a pea green paper muslin robe with a demi-train, cut bias on the gore, trimmed with point lace or chenille (the fashion editor is "busted" on technical terms), and yellow lambrequins pendant from the shoulders, and lace stockings cut Pompadour in the heel.

Put Them in Your Library.

Two of the best books of the kind ever written in this State are "Angel in the Cloud" and "Sea Gift." They are by the late Edwin W. Fuller, of Louisburg. The latter book is out of print, only a very few copies in the market, and the former one has passed into a second edition with portrait of the author. Alfred Williams & Co., of Raleigh, have both books for sale, price $1.50 each.

Among the other characteristics of the age it has been called by historians and essayists the era of great hotels. This is true, and foremost among the great hotels is New York's prime favorite, the "St. Nicholas," veteran in years and experience. In every department it is managed with consummate taste and care, and the guest is treated with an attention very noticeable, compared with the laxity of many of its rivals. The consequences of its unequaled accommodations are found in its crowded daily arrivals.

A New Form of Investment.

The influx of wealth into this country after the past seven years of dullness is beginning to increase the speculative feeling in all channels of trade. Already the business centres are lively with the praises of mining, manufacturing, railroad, real estate and other speculations; but strange to say, so great is the well deserved confidence in the strict integrity characterizing every action of the managers of the celebrated Louisiana Lottery that its tickets for the monthly grand drawings which cost two dollars each are a favorites purchase of the leading bankers and brokers in all the large cities. M. A. Dauphin, P. O. Box 692, New Orleans, La., or at No. 319 Broadway, New York city, will give all desired information.

BOVINE, MISSISSIPPI, April 22, 1879.—The following correspondence will explain itself: A. WADDILL, ESQ., LYNCHBURG, VA.—Dear Sir: Observing a certificate from you in reference to the "Iron and Alum Mass," of the Seven Springs, in Washington county, Va., in relation to its efficacy for Liver Diseases, would you have the kindness to inform me whether you used the "Mass" or the "Water;" also, a description of the symptoms and such other information as you may deem pertinent. I am a long-time sufferer with Liver Complaint, and naturally feel very anxious on the subject of a remedy that will afford me even temporary relief. Your early reply will greatly oblige, very respectfully,
WILLIAM BARR.

LYNCHBURG, Va., May 12, 1879.—WM. BARR, Esq., Bovine, Mississippi—Dear Sir: Your inquiry in regard to the "Liver case" which was effectually cured in my family from using the "Seven Springs Mass," is before me. The case referred to in my certificate was that of my wife's sister, who is now in her 80th year, and has been a member of my family for the last 27 years. She had been afflicted with Liver Disease for 30 years, sometimes almost dying with pains in the back, breast, and heaviness of the chest, heart-burns (intensely), sick stomach, vomiting, &c. I procured a few bottles of the "Mass" for her, and very soon after she began the use of it, her health commenced to get better, and she continued steadily to improve, and at this writing, so old, seemingly in as good health as a person who had never been afflicted with these diseases. She attributes her cure entirely to the efficacy of the "Seven Springs Mass." I regard it one of the greatest family medicines we have access to, not only for such diseases as above indicated, but for various other complaints for which it is recommended. Hoping these answers satisfactory, I am, very truly, A. WADDILL, Proprietor Lynchburg News.

Cuticura

REMEDIES

Infallibly Cure all Skin and Scalp Diseases, Scaly Eruptions, Itchings, and Irritations

The testimonials of permanent cures of Skin and Scalp Diseases which have been the torture of a lifetime by the Cuticura Remedies, are more wonderful than any methods or remedies known to the medical profession.

Cuticura Resolvent, a powerful Blood Purifier, is the only purifying agent which finds its way into the circulating fluid and thence through the oil and sweat glands to the surface of the skin, thus destroying the poisonous elements with which these vessels have been daily charged. Cuticura, The Great Skin Cure, applied externally, arrests all unnatural or morbid growth which cover the surface of the diseased glands and tubes with Scaly, Itching, and Irritating Humors, speedily it removes them, leaving the pores open, healthy, and free from diseased particles of matter.

Thus internally and externally do these great remedies act in conjunction, performing cures that have astonished the most noted physicians of the day.

Salt Rheum for 30 Years

On the Head, Face, and Greater Par of the Body, Cured.

Messrs. WEEKS & POTTER: Gentleme, I have been a great sufferer with Salt Rheum for 30 years, commencing in my head and face and extending over th greater part of my body. I have taken gallons of medicines for the blood of different kinds and tried good physicians, all of which did me no good, and I came to the conclusion that I could not be cured. But a friend called my attention to an article in the Union on skin diseases, and I got a box of Cuticura. The first application was a great relief and the third took the scales all off, and I felt like a new man. I have used three 50-cent boxes and my skin is smooth and I consider myself entirely cured. Hoping that this may be seen by some one afflicted as I have been (if there is any) is my earnest wish. And I cheerfully recommend it to all persons afflicted with like diseases.
Yours truly,
B. WILSON LORD.

AGAWAM, MASS., Sept. 9, 1878.

The Cuticura Soap should be used for cleansing all diseased surfaces, as most soaps are injurious to the skin.

LEPROSY.

A Modern Miracle. Astonishing Results from the use of Cuticura.

Messrs. WEEKS & POTTER: Gentlemen.—We have a case of Leprosy in our poorhouse which is being cured by your Cuticura remedies. The county had employed all of our doctors and had sent to New York for advice, but to no avail.

The patient commenced using the Cuticura and immediately began getting better. He had been confined to his bed for two and one half years. Had not had his clothes on during this time. Last week he dressed for the first time.

When he walked, there would at least one quart of scales come off of him.

This happened every day.

We think it is a wonderful cure.

We do not think he is cured, but he is in a fair way to be cured to say the least.

Yours truly,
DUNNING BROTHERS,
Druggists and Bookellers.

ALLEGAN, MICH., Feb. 11, 1879.

NOTE.—Messrs. Dunning Brothers are thoroughly reliable gentlemen, and were unknown to us prior to the receipt of this letter. We firmly believe this Cuticura will permanently cure this very severe case of Leprosy, as it has done many others.

Prepared by Weeks & Potter, Chemists and Druggists, 360 Washington Street, Boston, Mass., and for sale by all Druggists and Dealers. Price of Cuticura, small boxes, 50 cents; large boxes containing two and one half times the quantity of small, $1. Resolvent, $1 per bottle. Cuticura Soap, 25 cents per cake; by mail, 30 cents; 3 cakes, 75 cents.
